

What benefits does an arts education provide?

Students of the arts disciplines gain valuable skills and tools for:

- 21st Century Skills necessary to be successful in college and tomorrow's work force. (Collaboration, Creativity, Communication, and Critical Thinking)
- Understanding human experiences, both past and present;
- Learning to adapt to and respect others' way of thinking, working, and expressing themselves;
- Learning artistic modes of problem solving, which bring an array of expressive, analytical, creative, and developmental tools to every human situation;
- Understanding the influences of the arts in their power to create and reflect cultures, in the impact of design on virtually all we use in daily life, and in the interdependence of work in the arts with the broader worlds of ideas and actions;
- Making decisions in situations where there are no standard or "right" answers;
- Analyzing nonverbal communication and making informal judgments about cultural products and issues, and;
- Communicating their thoughts and feelings in a variety of modes, giving them a vastly more powerful repertoire of self-expression.

Fine Arts Department Philosophy

We believe...

The Metea Valley High School Fine Arts Department prepares its students to become lifelong patrons and practitioners of the arts by fostering creativity, promoting critical thinking, and increasing aesthetic awareness.

National Core Arts Standards

CREATING: Conceiving and developing new artistic ideas and work.

PERFORMING: Realizing artistic ideas and work through interpretation and presentation.

RESPONDING: Understanding and evaluating how the arts convey meaning.

CONNECTING: Relating artistic ideas and work with personal meaning and external context.
